

### *Central Library*

The Central Library has many resources like books, journals, magazines etc. Working hours of library are 8AM to 6 PM. We have introduced the CAMS software developed locally customising it suitably to meet the needs of the library from the year 2016-17, which has been successfully utilised by the clientele. The software has been developed using the ASP.NET version. As far as automation is concerned, we could do it partially, and efforts are on to fully automate the library, up till the year 2015-2016, the library was maintained manually.

We have introduced the EduSys software developed locally customising it suitably to meet the needs of the library from the year 2021, which has been successfully utilised by the clientele. The software has been developed using the SQL Operating System and Software version is 2.0.22 and fully automate the library.

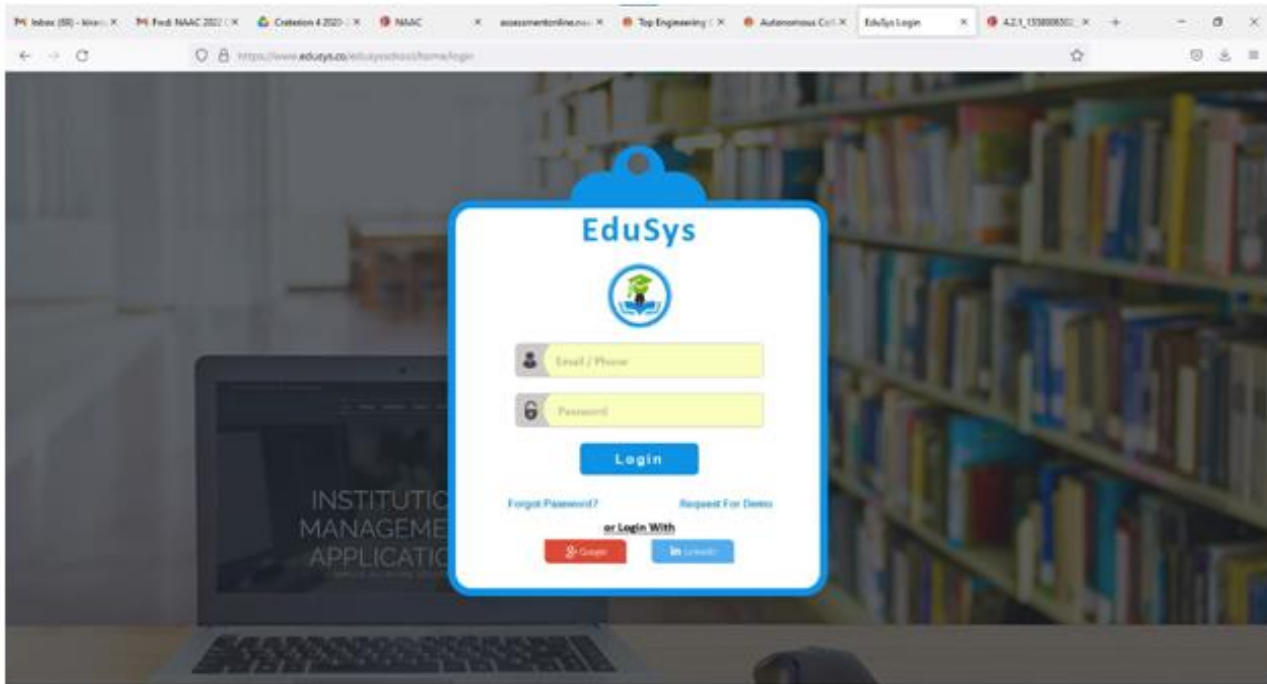

We have also established a Digital Library in the year 2013 with adequate Systems in a separate Hall to provide access to Internet E-Resources. Later during the year 2017-2018, we have extended the automated services to the Circulation Section successfully, and developed OPAC for the users.
