

**2.2.1 The institution assesses students' learning levels and organises special programmes for both slow and advanced learners:**

**Present a write-up within a maximum of 200 words.**

**File Description:**

In Telangana, two types of students are admitted to the Engineering Programmes. They are:

Students coming from

- a) English medium background from Central Board / State Board.
- b) Telugu medium background from State Board.

**Slow learners:**

When compared to +2 (or Inter) colleges there is a change in the teaching environment and the pattern colleges follow, due to which students sometime find it difficult to cope up and grasp the subjects especially at the starting of their college i.e. in their first semester.

**Strategies for slow learners:**

Tutorials / remedial special classes are conducted for these students to explain the critical topics and to clarify their doubts.

We monitor attendance of the students regularly, and will be sending a SMS or will call to the absentees or irregular student's parents. Mentor regularly interacts with them in friendly manner and helps them to overcome their respective problems and to achieve their goals.

We give regular assignments after completion of each unit, so that the students gain a perfect grip over the subject.

**Advanced learners:**

Advanced learners are those who are really good at problem solving and also perform well in their mid examinations, they are identified and the following strategies are performed.

**Strategies for Advanced Learners:**

To improve their overall skills Students are motivated in enrolling themselves in professional bodies like IEEE, IETE, and ISTE and various clubs.

They are motivated to participate in group discussions, technical quiz and in taking internships in industries that are related to their core subjects.
